

PROOF POSITIVE

ALFALFA IN WISCONSIN

QLF Agronomy L-CBF (Liquid- Carbon Based Fertilizer) products were applied at 22 locations across the state of Wisconsin as a part of a farmer trial experience. Below is the average ROI across all locations over a three year period. Cost included product, application cost and rates which varied from 4-6 gallons per acre. These farmer trials included 90 different plot locations, over 500 scissor cuttings and 100 lab samples.

3 YEAR AVERAGE ROI

\$66.02
