L-CBF 7-21-3 MKP STARTER

QLF Agronomy **L-CBF 7-21-3 MKP Starter** (liquid carbon based fertilizer) is a combination of balanced crop nutrients with complex carbon sources. Feeding soil biology and enhancing plant nutrient availability.

L-CBF 7-21-3 MKP promotes early plant and root growth for stronger starts and higher yields.

CHARACTERISTICS

- **High Orthophosphate Blend:** derived from the most concentrated 100% orthophosphate water soluble fertilizer available, MKP (monopotassium phosphate) is over 50% P₂O₅ and 34% K₂O
- **Provides a BOOST in Growth:** 7% sugars derived from QLF Cane Molasses and packaged with a fermentation yeast extract to help increase soil microbes and support plant growth. Microbes help make nutrients more plant-available, improve soil structure and speed residue decomposition.
- **All Major Crops:** L-CBF 7-21-3 MKP is a stand-alone starter that can be applied to corn, soybeans, alfalfa and small grains. Ask your consultant for more information on dilution rates and application methods.
