

# FOLIAR FEEDING

REDUCES  
DRIFT

IMPROVES  
NUTRIENT INTAKE

REDUCES  
PLANT STRESS

## **Why QLF?**

*QLF L-CBF products work as an excellent tank partner for feeding crop nutrients foliar and is compatible with most pesticide applications. Farmer tested and wind-tunnel validated, QLF L-CBF has demonstrated ability to stay on target and reduce drift. Feeding the plant a QLF L-CBF through foliar application reduces stress and physical injuries by softening chemistry and buffering out harsh salts while improving intake of nutrients and chemistry.*
