

ALTOSID IGR®

Horn flies reduce weaning weights 10-25 lb per calf, and slow stocker and heifer gains 0.2 lb per day.

Production losses come from:

- Reduced grazing time
- Increased stress
- Direct blood loss
- Heightened mastitis risk

Altosid-IGR®

- Prevents horn flies from maturing
- Works in the manure of treated animals
- Is extremely safe
- Is effective even if neighbors don't use IGR
- Is a cost - effective investment

Ignite with Altosid-IGR®

- Practical and convenient delivery on pasture
- Convenient
- Formulated with minerals and vitamins to fit the needs of livestock

HORN FLIES BITE !

- Horn flies cost the grazing industry **\$876 million annually.**
- Populations of this blood-sucking pest can easily reach 1000 to 4000 flies per animal, and each fly feeds -- bites -- 20 to 40 times per day.
- Heavily infested animals are bitten ***2 million times a month!***

QLF Ignite™ Low Moisture Supplements

- Controlled, Consistent Consumption
- High Energy/Nutrient Dense
- Vitamin & Mineral Fortified
- Highly Palatable
- Increased Forage Utilization and Digestion
- Convenient and Labor Saving
