

Recycle
your Residue

WITH QLF L-CBF BOOST

ARISE RESEARCH

RESIDUE DECOMPOSITION &
NITROGEN EFFICIENCY TRIALS
MARTINSVILLE, IL

Residue decomposition trials show the value of L-CBF BOOST®. Both improvements in residue recycling and improvements in total Nitrogen availability were exhibited in this field research study.

L-CBF BOOST extends the life cycle of you applied nitrogen, working with your nitrogen cycles to retain and recover more of each unit and dollar invested. L-CBF BOOST® showed a 368% improvement in soluble organic N and 11% improvement in decomposition.

*Results repeated over two years.
